

Nina Doinjashvili

Applied AI Engineer — LLM agents, RAG & workflow automation

Paris, France · +33 6 48 78 18 35 · ninodoinjashvili@gmail.com · Portfolio · GitHub · LinkedIn

Applied AI Engineer who turns business processes into reliable, production AI systems — LLM agents, RAG pipelines and workflow automation that connect private data, APIs and real users. Problem-first: I define the real business need before reaching for a model. RNCP Level 6 AI & Big Data Developer (Le Wagon, Paris). Shipped 3 production systems for real clients — working directly with non-technical stakeholders — with a focus on tool-using agents, evaluation and human-in-the-loop reliability. Open to relocation.

PROFESSIONAL EXPERIENCE

Applied AI Engineer · Freelance / Independent

2024 — Present

Paris, France · remote for international clients

- **Multi-channel booking & support agent** — built an LLM agent (RAG + tool calling) that answers customers on Facebook, Instagram and WhatsApp, checks availability and creates/cancels appointments across multiple staff calendars, auto-creates customer records, escalates uncertain cases to a human via Telegram, and sends day-before SMS reminders. Answers stay current from an owner-editable knowledge source — no code changes when offers or schedules change. Stack: n8n · OpenAI · Gemini · Google Calendar / Docs / Sheets · Meta Graph API · Twilio.
- **Loyalty & customer-capture automation** — built a QR-to-chat loyalty system: a landing page captures customers (with duplicate detection) into a database, GPT-4o Vision validates purchase receipts and reads amounts, and points accumulate to auto-issue single-use discount codes. Turned an unattended, anonymous sales channel into a first-party marketing database with fraud-resistant rewards. Stack: n8n · GPT-4o Vision · WhatsApp / Telegram · Docker · DigitalOcean.
- **Remote retail operations platform** — built a full-stack web app consolidating a fleet of connected machines into one dashboard: remote price control and product reservations, stock and product-lifetime tracking, revenue analytics by location, day and hour, and real-time sale alerts. Reverse-engineered the device's Android app (small-level patches) to enable remote price sync the stock product never supported. Stack: Node.js · Express · SQLite · REST APIs · background jobs · Web Push · PWA · Docker · apktool / smali.

Machine Learning Engineer · Capstone Project

2025

- Built an end-to-end GAN pipeline for image colorization; implemented pix2pix (U-Net generator + PatchGAN discriminator), evaluated with standard metrics, and shipped an interactive demo. Stack: Python · PyTorch / TensorFlow · Hugging Face · Streamlit.

TECHNICAL SKILLS

AI / Agents	LLM agents · multi-agent orchestration · LangGraph · Claude Agent SDK · tool calling / function calling · MCP · prompt engineering · structured outputs · evaluation & guardrails · A/B testing · human-in-the-loop · vision / OCR
RAG & Retrieval	RAG pipelines · embeddings · vector search · chunking · pgvector · Chroma · Pinecone
LLMs & Tooling	OpenAI · Anthropic Claude · Google Gemini · GPT-4o Vision · LangChain · async LLM calls · structured / JSON output
Automation	n8n · workflow automation · REST API integration · webhooks · Meta Graph API · Google Calendar · Twilio SMS
Backend & Data	Python (async) · FastAPI · Pydantic · Node.js · Express · SQL · SQLite · pandas · NumPy · data pipelines · background jobs
ML & Data Science	scikit-learn · TensorFlow · Keras · PyTorch · NLP · GANs (pix2pix) · model evaluation · data analysis
Infrastructure	Docker · GCP (Cloud Run, Vertex AI) · Hugging Face Spaces · PWA · Git · CI/CD
Languages	French (B2, TCF) · English (professional) · Georgian (native)

EDUCATION & CERTIFICATIONS

Concepteur Développeur en IA & Analyse Big Data — RNCP Level 6 · Le Wagon, Paris · 2026

Specialisation: agentic orchestration · NLP · FastAPI · Docker · Google Cloud Run

Licence — Economics & Management · Université Paris Nanterre · 2019–2021

Bachelor's Degree — Business & Economics · Tbilisi State University · 2010–2014 · recognised by ENIC-NARIC France

Certifications · Google AI Essentials · Google Data Analytics (Python, data insights) · Le Wagon: Intro to AI, Python, SQL · Data Science & SQL Bootcamps
